

**HARVARD
T.H. CHAN**
SCHOOL OF PUBLIC HEALTH

8th Kolokotronis Symposium on Data Science

so much data, so little time

Sponsored by the Program on Causal Inference and
the Department of Epidemiology

Machine Learning for Health Sciences

*How can we better leverage machine learning to
change the future of healthcare?*

Panel discussion co-hosted by

Drs. Andrew Beam, Sherri Rose, and David Sontag

Dr. Beam is a Senior Fellow at Flagship Pioneering, the head of machine learning at a Flagship-backed startup, and a visiting lecturer in the Department of Epidemiology at the HSPH. His research solves problems in medicine through the use of machine learning, and he has a special interest in developing models for preterm infants in the neonatal intensive care unit.

Dr. Rose is an associate professor in the Department of Health Care Policy at the Harvard Medical School and the co-director of the Health Policy Data Science Lab, whose methodological research focuses on statistical machine learning with applications in health policy.

Dr. Sontag is an associate professor of electrical engineering and computer science at MIT, who focuses on advancing machine learning and artificial intelligence to address issues in health care.

Friday, May 3, 2019 | 3:45-5:15pm | 106 Gordon Hall

Open to anyone interested in data science. Refreshments will be served.

RSVP at hsph.harvard.edu/causal/kolokotronis
